

EXTRA EXTRA!!! THE EYE-DRAWER HAS BEEN FOUND!

You won't believe what happened yesterday. It's actually wild what showed up in the tech dump. Plus, on my way through the tunnels this morning, I accidentally uncovered the TRUTH about who's behind the mysterious eyes being drawn all across campus.

Plus, a very big personal development of mine finally came true, I hope you will appreciate it as much as I do.

Without further ado, ladies and gentlemen, I present to you, Issue #2.5 of *Tunnel Vision Weekly*!

Table of Contents

What's new in box(es)	State of the Art (JEC edition)	Tunnel Vision: Out of the tunnel
-The latest and greatest of all time has been found	-THE EYE-MAKER HAS BEEN REVEALED	-I learned how to spin a pen

WHAT'S NEW IN BOX(ES): A NEW IN-BOX BOX

This Monday has truly been the latest and greatest of them all. Except for the fact that there was literally nothing new. I mean what did you expect to be here it's been a day, you probably are seeing this in the JEC dump anyway.

Here's a picture of a computer

And here's a picture of a box

Pretty cool right

STATE OF THE ART: THE MYSTERY OF THE EYES REVEALED

THE HONORABLE SHIRLEY ANN JACKSON PHD, D.L. (HON.), D.Sc. (HON.), NAE STRIKES AGAIN - SHE WAS SPOTTED IN THE TUNNELS, DRAWING THE MYSTERIOUS EYES...

On Monday, I was walking around, and who did I see but The Honorable Shirley Ann Jackson Ph.D, D.L. (Hon.) D.Sc (Hon.) NAE, drawing the ever-present eyes in the tunnels. I attempted to interview her to ask why, but her hyper-activated senses perceived me before I could even get close. She darted out of the tunnels in a flash, leaving nothing but her art behind.

The reason why she's putting these eyes everywhere is obvious, at least to me. Clearly, she's still angry about not being president of RPI anymore, and has been trying to infiltrate the system ever since her departure. The eyes are signs that she is always watching, waiting for the perfect moment to wedge back into the RPI system.

Later that day, I did end up emailing her, requesting we had a conversation. She agreed this time, perhaps realizing the grave PR mistake she had made in the tunnels earlier. It was a pretty cool conversation, I gotta say.

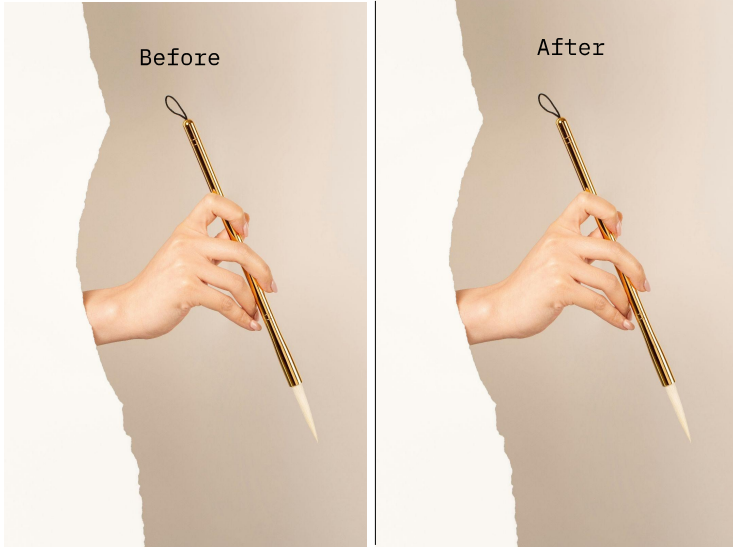

She practiced a lot in the JROWL-JEC tunnels. These are her best attempts, according to her.

Cover story: The Honorable Shirley Ann Jackson, moments after being caught in the tunnels yesterday.

I learned how to spin a pen guys

Guys I learned something really cool. I can spin a pen now, look!

Bet you wish you could do the same. I know, it's hard to look away, but you must at some point. Maybe someday you will be able to achieve the same level of mastery in pen spinning as I have been able to attain.
